 Manjeet Kumar

SKILLS

- **Programming Language:** C, C++, Python
- **Data Structures and Algorithms**
- **Frontend:** HTML, CSS, JavaScript, ReactJs, Bootstrap, Tailwind
- **Backend:** NodeJs, ExpressJs
- **Database:** MySQL, MongoDB
- **Miscellaneous:** Git, GitHub, EJS, REST APIs

EDUCATION

- B. Tech | CSE | Buddha Institute of Technology, GIDA **CGPA: 7/2025'**
- XII (UP Board) | JBIC Jagatbela, Gorakhpur **74%/2020**
- X (CBSE Board) | Saraswati Shishu Mandir Sr. Sec School, Gorakhpur **83%/2018**

ACADEMIC PROJECTS

- **Wanderlust (Full Stack Web-based Application) | EJS, CSS, JavaScript, Node, Express, MongoDB**
Built an immersive web application inspired by Airbnb, providing a platform for listing accommodations.
 - **Features:** Integrated user authentication and authorization to ensure secure access. Developed comprehensive RESTful services for seamless data interaction and management. The application includes rich user profiles, interactive property listings with detailed descriptions and images.
- **Online Chess Game | EJS, CSS, JavaScript, Node, Express, Chess.js, Socket.io**
Implemented a real-time, multiplayer chess game allowing users to play against each other online.
 - **Features:** Created an immersive real-time gameplay experience with robust socket communication for smooth interactions between players. The game offers a seamless user experience with a polished interface, instant move validation, and real-time updates. Additionally, it includes player statistics, game history, and an intuitive chat feature for player communication.
- **Simon Says Game | HTML, CSS, JavaScript**
Created a sequence-remembering game with a simple, user-friendly interface, making it accessible for players of all ages.
 - **Highlights:** Designed an engaging gameplay experience with vibrant visuals and intuitive controls, enhancing player enjoyment. The game features dynamic feedback and sound effects, making the gameplay more immersive and fun.
- **UrDormitory (A Room Details Provider) | C language**
Developed an application to offer users detailed information about vacant rooms, hostels, and PGs.
 - **Highlights:** Implemented efficient data handling mechanisms for room details using file handling, ensuring quick retrieval and updating of information. The application provides a seamless experience for users searching for accommodation, with comprehensive details and easy navigation.

ACHIEVEMENTS

- Clinched second place in the Google Developers Student Club Hackathon at MMMUT.
- Emerged victorious in a college coding competition focused on Data Structures and Algorithms (DSA).
- Secured top honors at the Techyuva event for the application "UrDormitory".
- Certified by NPTEL in "Problem-Solving through Programming in C" with a score of 73%.
